

QuadraConnector for SAP

Founded in 1990, **Quadrant Software** is a leading provider of Document Output Management (DOM) software and solutions for the enterprise. Through its award-winning product line, companies can electronically create, manage and distribute mission critical documents consistently, and efficiently.

QuadraConnector Topology

QuadraConnector provides SMTP connectivity to QuadraDocV5 (QDV5), offering inbound and outbound fax functionality by means of a gateway between the SAP system and fax server using the SAPconnect and SAPoffice interfaces. Microsoft IIS Manager relays fax and email traffic to the QuadraConnector processor, then, acting as a translator, converts files to formats that are compatible with QuadraDocV5

QuadraConnector

Features

- Tightly integrated with SAP
- Leverages SMTP connectivity to and from SAP user environment and production output
- Supports QuadraDocV5, running on VMware or Hyper-V

Benefits

- Supports latest version of SAP NetWeaver 7.3
- Automated delivery of business-critical documents and reduction of document delivery costs
- Improved user flexibility across platforms
- Indicates failure of a fax
- Can be customized to send failure notices to specific email addresses
- Provides tracking and archiving capabilities
- Software installations to SAP clients are not necessary
- Robust production faxing directly from any SAP application
- Desktop faxing from Business Workplace
- Real-time status available within the SAP system
- Virtually unlimited capacity

Requirements

- QuadraDocV5 and Windows Server 2008 or 2012
- Hyper-V 6.1.7600 or VMware ESXi 4.1 or greater
